

Westvlees – Automation Engineer

As an Automation Engineer at Westvlees, you are responsible for developing, implementing and optimizing automation systems within our production environment. You play a crucial role in increasing the efficiency, reliability and quality of our production processes.

Tasks and responsibilities:

- Designing and implementing **automation solutions** for production processes
- Analyzing existing systems and processes to identify and implement improvements
- Maintaining and optimizing **PLC programs**
- Collaborating with various departments to identify **automation** needs and develop solutions
- **Guiding installations**, testing and commissioning of new systems
- Solving technical problems and providing support in the event of malfunctions
- Staying up-to-date with the latest trends and technologies in the field of industrial automation

We are looking for the following competencies:

- Minimum Bachelor's degree in **Electrical Engineering**, Industrial Automation...
- You have strong **problem-solving** & analytical skills
- You are a **meticulous** and discreet team player
- Strong knowledge of Microsoft Office Software (Word, Excel, PowerPoint,...)
- You have a very fluent knowledge of **Dutch** and a good knowledge of **French** and **English**
- **Hands-on** mentality with a view to the future, change does not scare you

What we offer:

- A market-conform salary in line with your knowledge and experience
- A solid internal company training with opportunities to have you retrain externally through our **BPG University**
- Supplemented with numerous extra-legal benefits: Meal vouchers, Group insurance, Hospitalization insurance, Cafeteria plan...
- The opportunity to **grow** in a family business where Ambition, Healthy common sense and good food are central
- A delicious **company restaurant** with steak fries on the menu every Thursday
- A **padel court** where you can hit a ball with your colleagues after work
